Rahul Vashistha

Senior Data Analyst and Power BI Consultant

Pune, India | rahulvashistha1412@gmail.com | linkedin.com/in/rahul-vashistha-08nov | rahulvashistha.github.io

Profile

Microsoft-certified Power BI consultant with 4+ years building enterprise BI for EY, ZS Associates, Amgen and Lantheus. I design semantic models, tune DAX and queries, migrate legacy reporting and design dashboards, and I reconcile every fix against source data before calling it done.

Experience

Ernst & Young (EY) | Senior Data Analyst, Power BI Consultant

Nov 2025 to present, Pune. Assigned to ZS Associates since December 2025.

Lantheus, commercial analytics platform (Jul to Oct 2026)

- Delivered a five-screen Power BI report, all five in production, on one governed semantic model sourced from Databricks; wrote 119 DAX measures for a single screen.
- Closed a row-level security gap where clearing a slicer bypassed access, by enforcing security at the data layer.
- Traced a 4× data inflation in the legacy quota source and rebuilt the model; parent-to-child reconciliation matched with 0.00 variance.
- Cut a report query from about 530 s to about 2 s (~265×) by moving high-cardinality columns off a transactional fact table.

Lantheus, site operations and alternate facility dashboard (2026)

- Rebuilt a multi-tab report as a single-page, workflow-first dashboard on a composite model (DirectQuery and Import) over Azure Databricks.
- Cut a core chart's load time from about 40 s to 3.5 s (~90%) by removing a 65-query fan-out; fixed three production defects and an authentication gap.

Amgen, BusinessObjects to Power BI migration (Dec 2025 to Jul 2026)

- Migrated, repointed and validated 33+ master reports covering 40+ sub-reports from a ~150-report SAP BusinessObjects estate.
- Designed 4 reusable semantic models and deployed across Dev, QA and Production, with custom Databricks views and security.

Hexaware Technologies, delivering for EY

2022 to 2025, Chennai and Pune. Power BI, data modelling and Databricks.

Azure DevOps effort and utilisation suite

- Built 8+ dashboards over 250K work hours with utilisation bands, drill-downs and automated weekly email reports; cut manual reporting by 80%.
- Reduced load times by about 40% by rewriting iterator-heavy DAX, adding aggregation tables and reducing grain.

Technical support dashboards on ServiceNow

- Delivered Ticket, Resolved and Agent Summary dashboards with DAX for ageing, SLA and oldest-item detection; cut manual reporting by 60%.

ACAS/ISR asset and identity compliance platform

- Owned Databricks pipelines for 60+ tables and about 8 Power BI models (snowflake schema, snapshot tables, RLS and RBAC, incremental refresh); cut manual prep by 70%.
- Led internal audits, wrote guidebooks and data model specs, and ran Power BI training.

Education

Bachelor of Engineering, Computer Science

Savitribai Phule Pune University, 2018 to 2022

Certifications

PL-300	Power BI Data Analyst Associate, Microsoft	Feb 2024
OCI	OCI 2023 Certified Foundations Associate, Oracle	Aug 2023
CLF-C01	AWS Certified Cloud Practitioner	May 2023
DP-900	Azure Data Fundamentals, Microsoft	Feb 2023
AI-900	Azure AI Fundamentals, Microsoft	Jan 2023
AZ-900	Azure Fundamentals, Microsoft	Dec 2022
MTA	Introduction to Programming Using JavaScript, Microsoft	Mar 2021
AIF-C01	AWS Certified AI Practitioner	
PCEP	Certified Entry-Level Python Programmer	
Copilot	GitHub Copilot, GitHub	
Scrum	Scrum Fundamentals	

Skills

Power BI: Desktop and Service, DAX, Power Query (M), TMDL, field parameters, bookmarks, drill-through, Performance Analyzer, DAX Studio

Modelling: Star and snowflake schemas, bridge and snapshot tables, composite models, incremental refresh, RLS and RBAC

Data: SQL, Azure Databricks, Spark SQL, Unity Catalog, Snowflake, ETL pipelines, Python

Platforms: Power Automate, Power Apps, Azure DevOps, ServiceNow, SAP BusinessObjects

Working style: Stakeholder management, requirement gathering, end-user documentation, training
